A22. DERIVATIVE FINANCIAL INSTRUMENTS

The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the end of the reporting period, and do not represent amounts at risk.

Trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

A22. DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

The Group's derivative financial instruments are subject to market and credit risk, as follows:

Market Risk

Market risk is defined as any fluctuation in the value arising from changes in value of market risk factors such as interest rates, currency exchange rates, credit spreads, equity prices, commodities prices and their associated volatility. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. The Group's risk management department monitors and manages market risk exposure via stress testing of the Group's Value-at-Risk (VaR) model, in addition to reviewing and analysing its treasury trading strategy, positions and activities vis-à-vis changes in the financial market, monitoring limit usage, assessing limit adequacy, and verifying transaction prices.

Credit Risk

Credit risk arises when counterparties to derivative contracts, such as interest rate swaps, are not able to or willing to fulfil their obligation to pay the Group the positive fair value or receivable resulting from the execution of contract terms. As at 30 June 2014, the amount of credit risk in the Group, measured in terms of the cost to replace the profitable contracts, was RM4,358 million (2013: RM5,020 million). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

There have been no changes since the end of the previous financial year in respect of the following:

- a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
- b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
- c) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group are discussed in the audited annual financial statements for the financial year ended 31 December 2013 and the Risk Management section of the 2013 Annual Report.

A23. COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group enter into various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured over the Group's assets except for certain financial assets held for trading being pledged as credit support assets for certain over-the-counter derivative contracts.

[#] Interim dividend for financial year ended 31 December 2013 was paid in March 2014.

The capital base of CIMB Bank Group, CIMB Bank and CIMB Islamic Bank as at 30 June 2014 have excluded portfolio impairment allowance on impaired loans restricted from Tier II capital of RM257 million, RM233 million and RM24 million respectively.

^{*} The amount presented here is the Solvency Ratio of CIMB Bank Plc, which is the nearest equivalent regulatory compliance ratio. This ratio is computed in accordance with Prakas B7-00-46, B7-04-206 and B7-07-135 issued by the National Bank of Cambodia. This ratio is derived at CIMB Bank Plc's net worth divided by its risk-weighted assets.

[^] On 24 April 2014, CIMBGH completed its third Dividend Reinvestment Scheme ("DRS") of which approximately RM702 million was reinvested into new CIMBGH shares. Pursuant to the completion of the DRS, CIMBGH reinvested cash dividend surplus of RM454 million into CIMB Bank via rights issue which was completed on 30 June 2014.

CIMB Group proposed to continue with DRS implementation for the first interim dividend in respect of the financial year ending 2014. Pursuant to the completion of DRS, CIMB Group intend to reinvest the excess cash dividend into the Bank which would increase the capital adequacy ratios of the Group and Bank above those stated ratios.

A26. FAIR VALUE ESTIMATION

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Determination of fair value and fair value hierarchy

Valuation Model Review and Approval

- Mark-to-Model process shall be carried out by Market Risk Management within Group Risk. Group Risk Management Quantitative Analysts are responsible for independent evaluation and validation of the Group's financial models used for valuation. The validation includes an assessment of the stability of models in terms of performance over a variety of conditions and back-testing of the model outputs;
- Valuation methodologies for the purpose of determining Mark-to-Market prices will be verified by Group Risk Management Quantitative Analysts before submitting to Group Risk Committee and Board for approval;
- Market Risk Management is mandated to perform mark-to-market, mark-to-model and rate reasonableness verification;
- Any material uncertainty arising from the modeling and market inputs shall be disclosed to the Group Risk Committee;
- Market rate sources and model inputs for the purpose of Mark-to-Model must be verified by Group Risk Management Quantitative Analysts and approved by Chief Risk Officer or / and Group Risk Committee;
- Group Risk Management Quantitative Analysts are the guardian of the financial models and valuation methodology. Group Risk Management Quantitative Analysts shall perform model verification at least once a year. The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer;
- Model risk and unobservable parameter reserve must be considered to provide for the uncertainty of the model assumptions;
- Independent price verification process shall be carried out by Market Risk Management to ensure that financial assets/liabilities are recorded at fair value; and
- Back testing of valuation models to assess the accuracy of the models is to be carried out for a period of one year or where 250 data points have been collected, whichever is later.

The fair value hierarchy has the following levels:

- Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 Inputs to the valuation methodology include:
 - Quoted prices for similar assets and liabilities in active markets; or
 - Quoted prices for identical or similar assets and liabilities in non-active markets; or
 - Inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 One or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Assets/liabilities are classified as Level 1 when the valuation is based on quoted prices for identical assets or liabilities in active markets.

Assets/liabilities are regarded as being quoted in an active market if the prices are readily available from a published and reliable source and those prices represent actual and regularly occurring market transactions on an arm's length basis.

When fair value is determined using quoted prices of similar assets/liabilities in active markets or quoted prices of identical or similar assets and liabilities in non-active markets, such assets/liabilities are classified as Level 2. In cases where quoted prices are generally not available, the Group determines fair value based upon valuation techniques that use market parameters as inputs. Most valuation techniques employ observable market data, including but not limited to yield curves, equity prices, volatilities and foreign exchange rates.

Assets/liabilities are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data. Such inputs are determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

If prices or quotes are not available for an instrument or a similar instrument, fair value will be established by using valuation techniques or Mark-to-Model. Judgment may be required to assess the need for valuation adjustments to appropriately reflect unobservable parameters. The valuation models shall also consider relevant transaction data such as maturity. The inputs are then benchmarked and extrapolated to derive the fair value.

Investment properties (Recurring)

The investment properties are valued annually at fair value based on market values determined by independent qualified valuers. The fair values are within level 2 of the fair value hierarchy. The fair values have been derived using the sales comparison approach. Non-current assets held for sales (Non-recurring)

In accordance with MFRS5, the non-current assets held for sales were stated at the lower of carrying amount and fair value less cost to sell. As at 30 June 2014, the property plant and equipment and investment properties held for sales that were stated at fair value less cost to sell was RM19,501,000 (2013: RM21,598,000). B1. GROUP PERFORMANCE REVIEW COMPARISON WITH THE PRECEDING QUARTER'S RESULTS CIMB CIMB Group Holdings ("CIMB Group") Results

CIMB Group Holdings Berhad ("CIMB Group" or the "Group") today reported a net profit of RM2.016 billion for the first half of 2014 ("1H14"), equivalent to a net earnings per share ("EPS") of 24.6 sen. In 1H13, the Group reported a 1H13 net profit of RM2.440 billion, which includes a RM365 million net gain from the sale of CIMB Aviva. Excluding the exceptional gains, the Group's Business As Usual ("BAU") 1H14 net profit decreased by 2.8% year-on-year ("Y-o-Y"). The Group's annualised 1H14 net return on average equity ("ROE") was 12.2% with an enlarged equity base following the private placement of new shares in January 2014. The Group declared a first interim net dividend of 10.00 sen per share to be paid in the form of cash or an optional Dividend Reinvestment Scheme ("DRS"). The total interim dividend amounts to a net payment of RM834 million, translating to a dividend payout ratio of 41.3% of 1H14 profits.

CIMB Group Y-o-Y Results

For comparative purposes, the Y-o-Y performance is based on BAU numbers for 1H13. CIMB Group's 1H14 operating income was 1.0% higher at RM6.945 billion. Net interest income was 6.4% higher while non-interest income declined by 10.0%, due to a combination of lower volatility in treasury markets, weaker equity markets and decline in Indonesia bancassurance fees. CIMB Niaga's contribution to the Group was also impacted by an 11.8% Y-o-Y foreign exchange depreciation in the Rupiah. Operating expenses declined 1.1% as the Group's cost control efforts show results. The Group's profit before tax ("PBT") was 2.8% lower at RM2.712 billion.

The Group's regional Consumer Bank PBT expanded by 1.4% Y-o-Y in 1H14 to RM1.190 billion, making up 44% of Group PBT (from 42% in 1H13), with Thailand and Singapore turning profitable. Malaysia now contributes 79% of total Consumer Banking operations. The Group's Regional Wholesale Banking PBT declined by 11.3% Y-o-Y to RM1.228 billion due to the slower equity and treasury markets. Investments was up 26.2% Y-o-Y. The overall contribution of the Group's core corporate and consumer banking business has increased from 68% to 70% of total PBT.

Non-Malaysian PBT contribution to the Group was lower at 35% in 1H14 from 39% in 1H13. This was mainly due to the 20.1% Y-o-Y decline in Indonesia's PBT to RM741 million from the lower CIMB Niaga earnings and the Rupiah's depreciation. Thailand's PBT contribution to the Group grew 5.2% Y-o-Y at RM125 million as the strong growth at CIMB Thai was offset by much weaker performance at CIMB Securities (Thailand). Total PBT contribution from Singapore rose 13.2% to RM160 million as CIMB Bank Singapore PBT grew by 58.2% Y-o-Y.

The Group's total gross loans (excluding the declining bad bank loan book) expanded 8.5% Y-o-Y or 11.3% after adjusting for foreign exchange fluctuations. Over the same period, total deposits grew 4.8% Y-o-Y or 7.8% higher Y-o-Y after excluding foreign exchange fluctuations. This raised the Group's loan to deposit ("LDR") ratio to 89.7% from 86.2% previously.

The Group's gross impairment ratio improved to 3.1% as at June 2014 from 3.6% in June 2013, with allowance coverage (including regulatory reserve) of 104.5% as at June 2014. The Group's cost to income ratio was marginally higher at 57.9% compared to 57.7% previously. However, compared to the BAU of 59.1% in 1H13, the 1H14 cost to income ratio improved markedly. The Group's Net Interest Margins ("NIM") were unchanged at 2.88%.

As at 30 June 2014, CIMB Group's total capital ratio stood at 14.7% while its Common Equity Tier 1 (CET 1) capital ratio stood at 9.5%.

CIMB Group Q-o-Q Results

The Group's 2Q14 operating income of RM3.407 billion were 3.7% lower than 1Q14, as the 4.0% Q-o-Q increase in net interest income was offset by the 20.0% Q-o-Q reduction in non-interest income in light of the lower fee-based income from CIMB Niaga's Consumer business. 2Q14 net profit was 10.9% lower Q-o-Q at RM950 million due to higher loan impairment at CIMB Niaga.

CIMB Niaga Results

On 29 July 2014, CIMB Niaga reported a 1H14 net profit of IDR1,953 billion, a 8.5% Y-o-Y decline, with a 1H14 annualised net ROE of 14.5%. The weaker Y-o-Y performance was underpinned by the reduction in non-interest income and increased overhead expenses and provisions. On a sequential basis, the 2Q14 net profit was 22.1% lower than 1Q14.

CIMB Niaga's gross loans grew 9.1% Y-o-Y for 1H14 mainly driven by the small, medium and micro enterprises ("SMME") and corporate banking segments, which expanded by 15.3% and 11.7% respectively. Retail banking loans grew 2.9% while the commercial banking segment grew 9.1%. The Gross NPL stood at 3.0% as at end-1H14 compared to 2.2% in 1H13. CIMB Niaga's loan loss coverage (based on BI definition) stood at 86.5% as at end-1H14 compared to 112.9% as at end-1H13.

CIMB Niaga's core capital and risk weighted capital ratios stood at 13.9% and 16.1% respectively as at 30 June 2014.

B1. GROUP PERFORMANCE REVIEW COMPARISON WITH THE PRECEDING QUARTER'S RESULTS (CONTINUED)

CIMB Thai Results

On 17 July 2014, CIMB Thai announced a 11.2% Y-o-Y growth in net profit to THB625 million for 1H14. The better performance was attributed to the strong loans growth, improved NIMs as well as expansion in non-interest income. Sequentially, CIMB Thai's net profit was 58.2% lower Q-o-Q due to the lack of treasury investment gains which occurred in 1Q14.

The annualised loan loss charge increased to 1.0% from 0.7% as at 1H14, while the loan loss coverage ratio rose to 100.8% from 83.1% at end-1H14 as CIMB Thai kept coverage high in view of the challenging economic conditions. CIMB Thai's net NPL ratio improved to 1.8% from 1.9% previously.

CIMB Islamic

CIMB Islamic's Y-o-Y PBT increased by 16.0% to RM277 million due to a recovery in Islamic capital markets activity. CIMB Islamic's gross financing assets grew 0.6% Y-o-Y, accounting for 14.5% of total Group loans. Total deposits grew by 13.3% Y-o-Y to RM40.1 billion.

B3. PROSPECTS FOR THE CURRENT FINANCIAL PERIOD

CIMB Niaga is a large component of the Group's portfolio and the operating environment in Indonesia is expected to remain challenging as last year's sharp turn in Indonesia's terms of trade, interest rates and currency impacts borrowers and liquidity in the system.

CIMB Malaysia should have a steady second half, while CIMB Singapore continues to grow strongly. With the improving economic outlook for Thailand, we are also optimistic on the outlook for CIMB Thai. Given our strong market shares in treasury markets and investment banking we remain primed to benefit when market volumes and volatility improve.
