A23. DERIVATIVE FINANCIAL INSTRUMENTS

The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the end of the reporting period, and do not represent amounts at risk.

Trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

A23. DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

The Group's and the Company's derivative financial instruments are subject to market, credit risk and liquidity risk, as follows:

Market Risk

Market risk is defined as any fluctuation in the value arising from changes in value of market risk factors such as interest rates, currency exchange rates, credit spreads, equity prices, commodities prices and their associated volatility. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. The Group's risk management department monitors and manages market risk exposure via stress testing of the Group's Value-at-Risk (VaR) model, in addition to reviewing and analysing its treasury trading strategy, positions and activities vis-à-vis changes in the financial market, monitoring limit usage, assessing limit adequacy, and verifying transaction prices.

Credit Risk

Credit risk arises when counterparties to derivative contracts, such as interest rate swaps, are not able to or willing to fulfil their obligation to pay the Group the positive fair value or receivable resulting from the execution of contract terms. As at 30 June 2016, the amount of credit risk in the Group and the Company, measured in terms of the cost to replace the profitable contracts, was RM10,312,318,000 and Nil respectively (2015: RM11,708,849,000 and RM74,000 respectively). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

Liquidity Risk

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are widely traded.

Cash requirements of the derivatives

Cash requirements of the derivatives may arise from margin requirements to post cash collateral with counterparties as fair value moves beyond the agreed upon threshold limits in the counterparties' favour, or upon downgrade in the Bank's credit ratings. As at 30 June 2016, the Group has posted cash collateral of RM4,501 million (31 December 2015: RM5,384 million) on their derivative contracts.

There have been no changes since the end of the previous financial year in respect of the following:

- a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
- b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
- c) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group are disclosed in the audited annual financial statements for the financial year ended 31 December 2015 and the Risk Management section of the 2015 Annual Report.

A24. COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group enter into various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured over the Group's assets except for certain financial assets held for trading being pledged as credit support assets for certain over-the-counter derivative contracts.

A27. FAIR VALUE ESTIMATION

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Determination of fair value and fair value hierarchy

Valuation Model Review and Approval

- Mark-to-Model process shall be carried out by Market Risk Management within Group Risk. Group Risk Management Quantitative Analysts are responsible for independent evaluation and validation of the Group's financial models used for valuation;
- Valuation methodologies for the purpose of determining Mark-to-Market prices will be verified by Group Risk Management Quantitative Analysts before submitting to Group Risk Committee for approval;
- Market Risk Management is mandated to perform mark-to-market, mark-to-model and rate reasonableness verification;
- Any material uncertainty arising from the modeling and market inputs shall be disclosed to the Group Risk Committee;
- Market rate sources and model inputs for the purpose of Mark-to-Model must be verified by Group Risk Management Quantitative Analysts and approved by Chief Risk Officer or / and Group Risk Committee;
- Group Risk Management Quantitative Analysts are the guardian of the financial models and valuation methodology. The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer;
- Model risk and unobservable parameter reserve must be considered to provide for the uncertainty of the model assumptions;
- Independent price verification process shall be carried out by Market Risk Management to ensure that financial assets/liabilities are recorded at fair value.

The fair value hierarchy has the following levels:

Level 1 - Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets and liabilities in active markets; or
- Quoted prices for identical or similar assets and liabilities in non-active markets; or
- Inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 - One or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Assets/liabilities are classified as Level 1 when the valuation is based on quoted prices for identical assets or liabilities in active markets.

Assets/liabilities are regarded as being quoted in an active market if the prices are readily available from a published and reliable source and those prices represent actual and regularly occurring market transactions on an arm's length basis.

When fair value is determined using quoted prices of similar assets/liabilities in active markets or quoted prices of identical or similar assets and liabilities in non-active markets, such assets/liabilities are classified as Level 2. In cases where quoted prices are generally not available, the Group determines fair value based upon valuation techniques that use market parameters as inputs. Most valuation techniques employ observable market data, including but not limited to yield curves, equity prices, volatilities and foreign exchange rates.

Assets/liabilities are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data. Such inputs are determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

If prices or quotes are not available for an instrument or a similar instrument, fair value will be established by using valuation techniques or Mark-to-Model. Judgment may be required to assess the need for valuation adjustments to appropriately reflect unobservable parameters. The valuation models shall also consider relevant transaction data such as maturity. The inputs are then benchmarked and extrapolated to derive the fair value.

On a year-on-year (Y-o-Y) basis, the Net Profit of RM1,687 million improved 1.7% compared to the Business As Usual (“BAU”) 1H15 Net Profit of RM1,659 million. The 1H16 net earnings per share (“EPS”) stood at 19.6 sen, while the annualised 1H16 net return on average equity (“ROE”) was 8.1%. The Group declared a first interim net dividend of 8.00 sen per share to be paid via cash or an optional Dividend Reinvestment Scheme (“DRS”). The Group had announced a special interim dividend-in-specie equivalent to 2.00 sen per share involving the distribution of CIMB Niaga B Shares to CIMB Group shareholders on a ratio of 1 CIMB Niaga share for approximately every 6.39 CIMB Group shares.

CIMB Group’s Consumer and Wholesale Banking divisions continue to perform well, especially with improved capital market activity in 2Q. Strict cost controls resulted in a 0.7% Y-o-Y decline in operating costs and coupled with the improved revenues, the Group’s 1H16 net profit was 1.7% better Y-o-Y. The Group’s CET1 capital ratio strengthened to 10.7% and is on-track toward our year-end target of 11%. The Group has also proposed a 40% dividend payout of 8 sen/share for the first half of this year. Given the macroeconomic conditions, the Group was pleased with its 1H16 performance.

CIMB Group 2Q16 Y-o-Y Results

For comparative purposes, the corresponding 1H15 numbers are based on BAU basis. CIMB Group’s 1H16 operating income grew 1.5% Y-o-Y to RM7,628 million underpinned by a 6.5% improvement in net interest income but partially offset by a 9.1% decline in non-interest income, which was impacted by the weaker capital market, particularly in 1Q16. Operating expenses declined 0.7% Y-o-Y but was 4.3% lower after excluding foreign currency translation effects, a reflection of the Group’s stricter cost controls. This brought about the 4.5% improvement in the Group’s Pre-Provisioning Operating Profit (“PPOP”). The Group’s PBT was 3.9% higher at RM2,312million, with loan provisions 1.1% lower Y-o-Y.

The Group’s regional Consumer Bank PBT increased by 35.8% Y-o-Y in 1H16 to RM1,192 million, making up 52% of Group PBT. The better performance was fuelled by the regional consumer loans growth, lower overhead costs and lower provisions. The regional Commercial Banking PBT was 16.7% lower Y-o-Y at RM230 million largely attributed to higher provisions in Thailand, Indonesia and Singapore. The Group’s Regional Wholesale Banking PBT improved by 6.2% Y-o-Y to RM859 million underpinned by a recovery in Treasury & Markets, with Corporate Banking and Investment Banking staying weak. Group Asset Management and Investments (“GAMI”)’s PBT expanded 8.3% Y-o-Y due to higher contributions from investments, while Group Funding PBT was 186.2% lower Y-o-Y from higher costs of funding and foreign exchange effects on investments.

Non-Malaysia PBT contribution to the Group increased to 25% in 1H16 compared to 23% in 1H15, largely attributed to the 241.2% Y-o-Y improvement in Indonesia’s PBT to RM331million in line with lower provision at CIMB Niaga. Thailand’s PBT contribution was 15.2% lower Y-o-Y at RM95 million owing to the increased loan provisions. Total PBT contribution from Singapore was 36.8% lower at RM132 million from increased commercial banking provisions.

The Group’s total gross loans (excluding the bad bank) expanded 6.6% Y-o-Y or 3.9% excluding FX fluctuations. Total deposits grew 7.1% Y-o-Y or 4.6% excluding FX fluctuations. The Group’s loan to deposit (“LDR”) ratio stood at 93.5% compared to 94.0% in 1H15.

The Group’s gross impairment ratio reduced to 3.2% as at June 2016 from 3.3% in June 2015, with a higher allowance coverage of 83.5% as at June 2016. The Group’s cost to income ratio improved to 55.4% compared with 56.7% in 1H15, with the Group’s cost management initiatives continuing to show results. The Group’s Net Interest Margins (“NIM”) were marginally lower at 2.63% driven mainly by the higher cost of deposits in Malaysia.

As at 30 June 2016, CIMB Group’s total capital ratio stood at 15.6% while the Common Equity Tier 1 (“CET1”) capital ratio strengthened to 10.7%.

CIMB Group 2Q16 Q-o-Q Performance

On a Q-o-Q basis, 2Q16 operating income was 4.8% higher at RM3,903million with non-interest income increasing by 19.0%, offset by a 0.4% decline in net interest income. The Consumer Banking PBT posted a 14.0% Q-o-Q growth on the back of revenue expansion and lower expenses. Commercial Banking PBT was 42.5% lower due to increased provisions during the quarter, while the 10.5% Q-o-Q increase in Wholesale Banking PBT was attributed to the improved capital market activity and gross loans growth in 2Q16. The 2Q16 net profit was 7.2% higher Q-o-Q at RM873 million attributed to the higher non-interest income and lower operating costs, partially offset by an uptick in provisions.
