## A23. DERIVATIVE FINANCIAL INSTRUMENTS

The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the end of the reporting period, and do not represent amounts at risk.

Trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

## A23. DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

The Group's and the Company's derivative financial instruments are subject to market, credit risk and liquidity risk, as follows:

## Market Risk

Market risk is defined as any fluctuation in the value arising from changes in value of market risk factors such as interest rates, currency exchange rates, credit spreads, equity prices, commodities prices and their associated volatility. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. The Group's risk management department monitors and manages market risk exposure via stress testing of the Group's Value-at-Risk (VaR) model, in addition to reviewing and analysing its treasury trading strategy, positions and activities vis-à-vis changes in the financial market, monitoring limit usage, assessing limit adequacy, and verifying transaction prices.

## Credit Risk

Credit risk arises when counterparties to derivative contracts, such as interest rate swaps, are not able to or willing to fulfil their obligation to pay the Group the positive fair value or receivable resulting from the execution of contract terms. As at 30 September 2017, the amount of credit risk in the Group and the Company, measured in terms of the cost to replace the profitable contracts, was RM8, $467,927,000$ and Nil respectively (2016: RM12,006,184,000 and Nil respectively). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

## Liquitiy Risk

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are wideliy traded.

## Cash requirements of the derivatives

Cash requirements of the derivatives may arise from margin requirements to post cash collatteral with counterparties as fair value moves beyong the agreed upon threshold limits in the counterparties' favour, or upon dowgrade in the Bank's credit ratings. As at 30 September 2017, the Group has posted cash collateral of RM2,636,816,000 ( 31 December 2016: RM4,260,509,000) on their derivative contracts.

There have been no changes since the end of the previous financial year in respect of the following:
a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
c) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group are disclosed in the audited annual financial statements for the financial year ended 31 December 2016 and the Risk Management section of the 2016 Annual Report.

## A24. COMMITMENTS AND CONTINGENCIES

(a) In the normal course of business, the Group enter into various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured over the Group's assets except for certain financial assets held for trading being pledged as credit support assets for certain over-the-counter derivative contracts.

## A27. FAIR VALUE ESTIMATION

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

## Determination of fair value and fair value hierarchy

The fair value hierarchy has the following levels:
Level 1 - Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets and liabilities in active markets; or
- Quoted prices for identical or similar assets and liabilities in non-active markets; or
- Inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
Level 3 - One or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.
Assets/liabilities are classified as Level 1 when the valuation is based on quoted prices for identical assets or liabilities in active markets.
Assets/liabilities are regarded as being quoted in an active market if the prices are readily available from a published and reliable source and those prices represent actual and regularly occurring market transactions on an arm's length basis.

When fair value is determined using quoted prices of similar assets/liabilities in active markets or quoted prices of identical or similar assets and liabilities in non-active markets, such assets/liabilities are classified as Level 2 . In cases where quoted prices are generally not available, the Group determines fair value based upon valuation techniques that use market parameters as inputs. Most valuation techniques employ observable market data, including but not limited to yield curves, equity prices, volatilities and foreign exchange rates.

Assets/liabilities are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data. Such inputs are determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

If prices or quotes are not available for an instrument or a similar instrument, fair value will be established by using valuation techniques or Mark-to-Model. Judgment may be required to assess the need for valuation adjustments to appropriately reflect unobservable parameters.

The valuation models shall also consider relevant transaction data such as maturity. The inputs are then benchmarked and extrapolated to derive the fair value.

## Valuation Model Review and Approval

- Fair valuation of financial instruments is determined either through Mark-to-Market or Mark-to-Model methodology, as appropriate;
- Market Risk Management is mandated to perform mark-to-market, mark-to-model and rate reasonableness verification. Market price and/or rate sources for Mark-to-Market are validated by Market Risk Management as part and parcel of rate reasonableness verification;
- Mark-to-Model process shall be carried out by Market Risk Management within Group Risk. Group Risk Management Quantitative Analysts are responsible for independent evaluation and validation of the Group's financial models used for valuation;
- Valuation methodologies for the purpose of determining Mark-to-Model prices will be verified by Group Risk Management Quantitative Analysts before submitting to the Group Market Risk Committee for approval;
- Group Risk Management Quantitative Analysts are the guardian of the financial models and valuation methodologies. Market rate sources and model inputs for the purpose of Mark-to-Model must be verified by Group Risk Management Quantitative Analysts and approved by Regional Head, Market Risk Management and/or the Group Market Risk Committee;
- Model risk and unobservable parameter reserve must be considered to provide for the uncertainty of the model assumptions;
- The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer; and
- Independent price verification process shall be carried out by Market Risk Management to ensure that financial assets/liabilities are recorded at fair value.

## A27. FAIR VALUE ESTIMATION (Continued)

The following represents the Group's and the Company's non-financial assets measured at fair value and classified by level with the following fair value measurement hierarchy as at 30 September 2017 and 31 December 2016.

## Investment properties (Recurring)

The investment properties of the Group are valued annually at fair value based on market values determined by independent qualified valuers. The fair values are within level 2 of the fair value hierarchy. The fair values have been derived using the sales comparison approach. Sales prices of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size.

## Non-current assets held for sales (Non-recurring)

In accordance with MFRS5, the non-current assets held for sales were stated at the lower of carrying amount and fair value less cost to sell. As at 30 September 2017, the property plant and equipment and investment properties held for sales of the Group that were stated at fair value less cost to sell was RM891,000 (2016: RM4,573,000). This is a non-recurring fair value which has been measured using observable inputs under sales comparison approach performed by independent valuers. Sales prices of comparable land and building in close proximity are adjusted for differences in key attributes such as property size. Therefore, it is within level 2 of the fair value hierarchy.

## Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

## B1. GROUP PERFORMANCE REVIEW COMPARISON WITH THE PRECEDING QUARTER'S RESULTS

## CIMB Group Holdings Berhad ("CIMB Group" or the "Group) results

CIMB Group Holdings Berhad ("CIMB Group" or the "Group") today reported a Profit Before Tax ("PBT") of RM4.57 billion for 9 months 2017 ("9M17"). On a year-on-year ("Y-o-Y") basis, the Group's 9 M 17 operating income expanded $11.6 \%$, translating to a $17.9 \%$ Y-o-Y improvement in Pre-Provision Operating Profit ("PPOP") and a $26.0 \%$ Y-o-Y growth in Net Profit to RM3.41 billion. The 9M17 net Earnings Per Share ("EPS") stood at 38.1 sen, while the annualised 9 M17 net Return On average Equity ("ROE") was $9.8 \%$.

The Group continued to show good progress, recorded its highest ever quarterly operating income of RM4.42 billion in 3Q17, and generated a $26.0 \%$ Y-o-Y growth in 9 M 17 net profit. The improved performance was underpinned by positive net interest margins, gradually declining provisions and healthier capital market activity. In particular, the Group's Consumer Banking franchise in Malaysia and Thailand, as well as Investment and Corporate Banking activities contributed to the respectable results for the quarter.

## CIMB Group 9M17 Y-o-Y Results

CIMB Group's 9M17 operating income grew $11.6 \%$ Y-o-Y to RM13.11 billion largely driven by a $11.2 \%$ growth in non-interest income in line with better capital market activity and improved fee income. 9 M 17 net interest income rose $11.7 \%$ from loans growth and improved Net Interest Margin ("NIM"). Operating expenses was $6.3 \%$ higher Y-o-Y but only rose $2.9 \%$ after excluding foreign currency translation effects, with the Group's sustained cost management efforts. The positive JAW brought about the $17.9 \%$ improvement in the Group's PPOP. The Group's PBT was $24.6 \%$ higher at RM4.57 billion, with loan provisions declining $0.3 \%$ Y-o-Y.

The Group's Regional Consumer Bank PBT was $10.8 \%$ higher Y-o-Y in 9M17 at RM1. 92 billion, making up $42 \%$ of Group PBT. Revenue growth was underpinned by a strong non-interest income performance while operating costs were under control and normalising provisions. The Regional Commercial Banking PBT declined by $14.2 \% \mathrm{Y}-\mathrm{o}-\mathrm{Y}$ as the revenue expansion from strong noninterest income growth was offset by higher provisions. The Group's Regional Wholesale Banking PBT improved 64.6\% Y-o-Y to RM1.85 billion from a combination of increased capital market activity, loans growth and lower provisions. Group Asset Management and Investments ("GAMI") PBT was $51.0 \%$ lower Y-o-Y without the equity accounting of the Bank of Yingkou, pending completion of its proposed sale. Group Funding PBT was $44.9 \%$ higher Y-o-Y from lower funding costs and FX translation gains.

Non-Malaysia PBT contribution to the Group rose to $33 \%$ in 9 M 17 compared to $25 \%$ in 9 M 16 . Indonesia's PBT expanded by $67.1 \%$ Y-o-Y to RM966 million in tandem with the improving financial performance at CIMB Niaga. Thailand's PBT contribution of RM194 million was $33.8 \%$ higher Y-o-Y arising from lower provisions and operating expenses. Total PBT contribution from Singapore was $45.2 \%$ higher at RM289 million on the back of improved revenues.

The Group's total gross loans (excluding the bad bank) grew by $7.0 \%$ Y-o-Y, while total deposits grew 4.5\% Y-o-Y. The Group's Loan to Deposit Ratio ("LDR") stood at $92.0 \%$ compared to $89.8 \%$ in 9 M 16 .

The Group's gross impairment ratio stood at $3.5 \%$ as at end-September 2017, with an allowance coverage of $72.4 \%$. The Group's Cost-to-Income ratio improved to $52.1 \%$ compared with $54.6 \%$ in 9 M 16 , in line with stronger revenues and sustained cost management. The Group's NIM improved to $2.67 \%$ for 9 M 17 from better liability management across all countries.

As at 30 September 2017, CIMB Group's total capital ratio stood at $16.6 \%$ while the Common Equity Tier 1 ("CET1") capital ratio rose to $12.0 \%$.

## CIMB Group 3Q17 Q-o-Q Performance

On a quarter-on-quarter ("Q-o-Q") basis, 3Q17 operating income was $2.2 \%$ higher at RM4.42 billion buoyed by the $13.6 \%$ growth in non-interest income and partially offset by a $2.2 \%$ decline in net interest income. Consumer Banking PBT was $13.2 \%$ higher Q-o-Q largely due to a better performance in all countries. Regional Commercial Banking PBT declined by 69.2\% Q-o-Q from lower revenue and increased provisions in 3Q17. Wholesale Banking PBT increased by $18.8 \%$ Q-o-Q mainly due to the better capital markets in 3Q17, lower operating expenses and loan provisions. GAMI PBT was $86.5 \%$ lower Q-o-Q due to the absence of investment gains and higher impairment, while Group Funding PBT increased by $24.4 \%$ due to higher FX gains. The Group's 3Q17 net profit was $2.6 \%$ higher Q-oQ at RM1.13 billion owing to increased operating income and lower provisions.

## CIMB Islamic

CIMB Islamic's 9M17 Y-o-Y PBT increased by $6.5 \%$ to RM577 million driven by the strong $14.5 \%$ operating income growth which was partially offset by increased impairments due to provision writebacks in 9M16.
