#### PART A - EXPLANATORY NOTES

#### A1. BASIS OF PREPARATION

The unaudited condensed interim financial statements for the financial period ended 30 June 2018 have been prepared under the historical cost convention, except for financial assets at fair value through profit or loss, debt instruments at fair value through other comprehensive income, equity instruments at fair value through other comprehensive income, derivative financial instruments, investment properties and non-current assets/disposal groups held for sale and financial liabilities designated at fair value through profit or loss, that have been measured at fair value.

The unaudited condensed interim financial statements have been prepared in accordance with MFRS 134 "Interim Financial Reporting" issued by the Malaysian Accounting Standards Board and paragraph 9.22 of Bursa Malaysia Securities Berhad's Listing Requirements.

The unaudited condensed interim financial statements should be read in conjunction with the Group's and the Company's audited financial statements for the financial year ended 31 December 2017. The explanatory notes attached to the condensed interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group and the Company since the financial year ended 31 December 2017.

The significant accounting policies and methods of computation applied in the unaudited condensed interim financial statements are consistent with those adopted in the most recent audited annual financial statements for the financial year ended 31 December 2017, and modified for the adoption of the following accounting standards applicable for financial periods beginning on or after 1 January 2018:

- MFRS 9 "Financial Instruments"
- MFRS 15 "Revenue from Contracts with Customers" and "Clarifications to MFRS 15"
- Amendments to MFRS 2 "Classification and Measurement of Share-based Payment Transactions"
- Amendments to MFRS 140 "Transfers of Investment Property"
- Annual improvement to MFRSs 2014 2016 Cycle:
  - Amendments to MFRS 1
  - Amendments to MFRS 128
- IC Interpretation 22 "Foreign Currency Transactions and Advance Consideration"

With the effect from the financial year beginning on/after 1 January 2018, the Group and the Company apply MFRS 9 "Financial Instruments", replacing MFRS 139 "Financial Instruments: Recognition and Measurement", and includes requirements for classification and measurement of financial assets and liabilities, impairment of financial assets and hedge accounting. MFRS 9 introduces an expected credit loss model on impairment that replaces the incurred loss impairment model used in MFRS 139. The expected credit loss model is forward-looking and eliminates the need for a trigger event to have occurred before credit losses are recognised. The new hedge accounting rules will align the accounting for hedging instruments more closely with the Group's risk management practices. As a general rule, more hedging relationships might be eligible for hedge accounting, as the standard introduces a more principles-based approach. The new standard also introduces expanded disclosure requirements and changes in presentation. Comparatives for 2017 will not be restated. The impact of adoption of MFRS 9 to the Group and the Company are disclosed in Note 35.

The adoption of the above new standards, amendments to published standards and interpretation are not expected to give rise to significant impact on the financial results of the Group and the Company, except for the cumulative impact on the adoption of MFRS 9 which is recognised in the retained earnings as at 1 January 2018.

The unaudited condensed interim financial statements incorporate those activities relating to Islamic banking which have been undertaken by the Group. Islamic banking refers generally to the acceptance of deposits, granting of financing and dealing in Islamic securities under Shariah principles.

The preparation of unaudited condensed interim financial statements in conformity with the MFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed interim financial statements, and the reported amounts of income and expenses during the reported period. It also requires Directors to exercise their judgement in the process of applying the Group and Company's accounting policies. Although these estimates and assumptions are based on the Directors' best knowledge of current events and actions, actual results may differ from those estimates.

#### A28. DERIVATIVE FINANCIAL INSTRUMENTS

The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the end of the reporting period, and do not represent amounts at risk.

Trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

### A28. DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

The Group's derivative financial instruments are subject to market risk, credit risk and liquidity risk, as follows:

### **Market Risk**

Market risk is defined as any fluctuation in the value arising from changes in value of market risk factors such as interest rates, currency exchange rates, credit spreads, equity prices, commodities prices and their associated volatility. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. The Group's risk management department monitors and manages market risk exposure via stress testing of the Group's Value-at-Risk (VaR) model, in addition to reviewing and analysing its treasury trading strategy, positions and activities vis-à-vis changes in the financial market, monitoring limit usage, assessing limit adequacy, and verifying transaction prices.

### **Credit Risk**

Credit risk arises when counterparties to derivative contracts, such as interest rate swaps, are not able to or willing to fulfil their obligation to pay the Group the positive fair value or receivable resulting from the execution of contract terms. As at 30 June 2018, the amount of credit risk in the Group, measured in terms of the cost to replace the profitable contracts, was RM10,063,571,000 (2017: RM8,447,957,000). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

# Liquitiy Risk

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are wideliy traded.

### Cash requirements of the derivatives

Cash requirements of the derivatives may arise from margin requirements to post cash collatteral with counterparties as fair value moves beyong the agreed upon threshold limits in the counterparties' favour, or upon dowgrade in the Bank's credit ratings. As at 30 June 2018, the Group has posted cash collateral of RM2,861,563,000 (31 December 2017: RM2,232,436,000) on their derivative contracts.

There have been no changes since the end of the previous financial year in respect of the following:

- a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
- b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts:
- c) the hedging policies in respect of foreign exchange and interest/profit rate exposures; and
- d) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group are disclosed in the audited annual financial statements for the financial year ended 31 December 2017 and the Risk Management section of the 2017 Annual Report.

### A29. COMMITMENTS AND CONTINGENCIES

(a) In the normal course of business, the Group enter into various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured over the Group's assets except for certain financial assets held for trading being pledged as credit support assets for certain over-the-counter derivative contracts.

#### A33. FAIR VALUE ESTIMATION

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Determination of fair value and fair value hierarchy

The fair value hierarchy has the following levels:

- Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 Inputs to the valuation methodology include:
  - Quoted prices for similar assets and liabilities in active markets; or
  - Quoted prices for identical or similar assets and liabilities in non-active markets; or
  - Inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 One or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Assets/liabilities are classified as Level 1 when the valuation is based on quoted prices for identical assets or liabilities in active markets.

Assets/liabilities are regarded as being quoted in an active market if the prices are readily available from a published and reliable source and those prices represent actual and regularly occurring market transactions on an arm's length basis.

When fair value is determined using quoted prices of similar assets/liabilities in active markets or quoted prices of identical or similar assets and liabilities in non-active markets, such assets/liabilities are classified as Level 2. In cases where quoted prices are generally not available, the Group determines fair value based upon valuation techniques that use market parameters as inputs. Most valuation techniques employ observable market data, including but not limited to yield curves, equity prices, volatilities and foreign exchange rates.

Assets/liabilities are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data. Such inputs are determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

If prices or quotes are not available for an instrument or a similar instrument, fair value will be established by using valuation techniques or Mark-to-Model. Judgment may be required to assess the need for valuation adjustments to appropriately reflect unobservable parameters. The valuation models shall also consider relevant transaction data such as maturity. The inputs are then benchmarked and extrapolated to derive the fair value.

#### Valuation Model Review and Approval

- Fair valuation of financial instruments is determined either through Mark-to-Market or Mark-to-Model methodology, as appropriate;
- Market Risk Management is mandated to perform mark-to-market, mark-to-model and rate reasonableness verification. Market price and/or rate sources for Mark-to-Market are validated by Market Risk Management as part and parcel of market data reasonableness verification:
- Valuation methodologies for the purpose of determining Mark-to-Model prices will be verified by Group Risk Management Quantitative analysts before submitting to the GMRC for approval;
- Mark-to-Model process shall be carried out by Market Risk Management in accordance with the approved valuation methodologies. Group Risk Management Quantitative analysts are responsible for independent evaluation and validation of the Group's financial models used for valuation;
- Group Risk Management Quantitative analysts are the guardian of the financial models and valuation methodologies. Market rate sources and model inputs for the purpose of Mark-to-Model must be verified by Group Risk Management Quantitative analysts and approved by Regional Head, Market Risk Management and/or the Group Market Risk Committee;
- Model risk and unobservable parameter reserve must be considered to provide for the uncertainty of the model assumptions;
- The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer; and
- Independent price verification process shall be carried out by Market Risk Management to ensure that financial assets/liabilities are recorded at fair value.

The following represents the Group's and the Company's non-financial assets measured at fair value and classified by level with the following fair value measurement hierarchy as at 30 June 2018 and 31 December 2017.

### Investment properties (Recurring)

The investment properties of the Group are valued annually at fair value based on market values determined by independent qualified valuers. The fair values are within level 2 of the fair value hierarchy. The fair values have been derived using the sales comparison approach. Sales prices of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size.

#### Non-current assets held for sales (Non-recurring)

In accordance with MFRS5, the non-current assets held for sales were stated at the lower of carrying amount and fair value less cost to sell. As at 30 June 2018, the property plant and equipment and investment properties held for sales of the Group that were stated at fair value less cost to sell was RM4,199,000 (2017: RM4,612,000). This is a non-recurring fair value which has been measured using observable inputs under sales comparison approach performed by independent valuers. Sales prices of comparable land and building in close proximity are adjusted for differences in key attributes such as property size. Therefore, it is within level 2 of the fair value hierarchy.

# B1. GROUP PERFORMANCE REVIEW COMPARISON WITH THE PRECEDING QUARTER'S RESULTS CIMB Group Holdings Berhad ("CIMB Group" or the "Group") results

CIMB Group Holdings Berhad ("CIMB Group" or the "Group") reported a record net profit of RM3.29 billion in the first half of 2018 ("1H18") bolstered by a gain from the sale of 20% of CIMB-Principal Asset Management ("CPAM") and 10% of CIMB-Principal Islamic Asset Management ("CPIAM") amounting to RM928 million. This raised the Group's 1H18 Return On average Equity ("ROE") to 11.5%, and reduced its Cost-to-Income Ratio ("CIR") to 46.1%.

On a Business-As-Usual ("BAU") basis, Profit Before Tax ("PBT") was RM3.27 billion for 1H18 representing a 7.4% year-on-year ("Y-o-Y") growth. Lower Y-o-Y operating expenses of 7.3% and loan loss provisions of 29.4% contributed to the Group's increase in 1H18 BAU net profit by 3.3% Y-o-Y to RM2.36 billion. This was achieved despite a 5.2% Y-o-Y drop in operating income due to weaker capital markets in Malaysia. The 1H18 net earnings per share ("EPS") stood at 25.4 sen, while the annualised ROE was 9.7%. The Group declared a first interim net dividend of 13.00 sen per share to be paid via cash or an optional Dividend Reinvestment Scheme ("DRS"). The total interim dividend amounts to a payment of approximately RM1.22 billion, translating to a dividend payout ratio of 51.6% of 1H18 net profits.

The Group is pleased with its record net profit of RM3.29 billion, contributed partly by the RM928 million gain from the strategic realignment of its shareholding in CPAM and CPIAM, which also provided an uplift of 15bps to CET1. Consumer banking chalked a stellar performance, posting a 34.7% Y-o-Y increase in PBT; while Commercial Banking's PBT rose by 19.9% Y-o-Y. The weaker markets in Malaysia, however, contributed to a lower PBT for Wholesale Banking.

CIMB Group's 1H18 operating income was 5.2% lower Y-o-Y at RM8.24 billion from a 6.1% decline in non-interest income from slower capital markets in Malaysia and a 4.8% decline in net interest income mainly from Commercial and Wholesale banking. This was offset by a RM163 million gain from the sale of 50% of CSI. Continued cost discipline brought about the 7.3% Y-o-Y decline in operating expenses, resulting in a fifth consecutive quarter of positive JAW, translating to a 1H18 CIR of 51.3%. The Group's PBT was 7.4% Y-o-Y higher at RM3.27 billion, with loan provisions declining 29.4%.

The Group's Consumer Bank PBT was 34.7% higher Y-o-Y in 1H18 at RM1,611 million, making up 49% of Group PBT. Consumer revenue growth was underpinned by good non-interest income performance, steady net interest income growth and lower provisions. The Commercial Banking PBT increased by 19.9% Y-o-Y, an encouraging sign of its regional business recalibration, as lower cost and provisions is partially offset by a decline in operating income. PBT at the Group's Wholesale Banking division was RM914 million or 26.2% lower Y-o-Y from a combination of significantly weaker capital markets and higher provisions. Group Asset Management and Investments ("GAMI") PBT improved 13.6% Y-o-Y from better performances in the public markets, in line with a 14.4% increase in assets under management. Group Funding PBT increased 26.9% Y-o-Y mainly from the RM163 million gain arising from the sale of 50% of CSI.

Non-Malaysia PBT contribution to the Group stood at 34% in 1H18, remaining the same as 1H17. Indonesia's PBT decreased 5.6% Y-o-Y to RM590 million. However, excluding FX translation effects, Indonesia's PBT expanded 8.6% Y-o-Y in line with CIMB Niaga's improving performance. Thailand's PBT contribution of RM257 million was a 50.3% Y-o-Y increase attributed to lower provisions. Total PBT contribution from Singapore was 5.1% higher Y-o-Y at RM225 million mainly from savings on the deconsolidation of CSI.

The Group's total gross loans (excluding the bad bank) grew by 3.4% Y-o-Y (+7.0% excluding FX effects), while total deposits were 1.5% higher Y-o-Y. The Group's Loan to Deposit Ratio ("LDR") stood at 94.0%, compared to 92.4% as at end-June 2017.

The Group's gross impairment ratio remained unchanged at 3.2% as at end-June 2018, with a higher allowance coverage of 106.8%. The Group's Cost-to-Income Ratio improved to 51.3% compared with 52.5% in 1H17, in line with continued cost management. The Group's Net Interest Margin ("NIM") was lower at 2.52% attributed to the contraction at CIMB Niaga.

As at 30 June 2018, CIMB Group's total capital ratio stood at 16.5% while the Common Equity Tier 1 ("CET1") capital ratio stood at 11.9%.

The Group's 2Q18 net profit fell 4.5% Y-o-Y to RM1.05 billion largely attributed to the weaker capital markets in 2Q18.
